

Where Epidemiology Meets Policy and Practice

Introducing the Epidemiology Foundation

(formerly the American College of Epidemiology
Research and Education Foundation)

Who we are...

The Epidemiology Foundation engages in educational, charitable and scientific activities to further knowledge about epidemiology among the general public, and promote scientific interaction between epidemiologists in industry, government, academia and other nonprofit organizations, in order to improve the public's health. It exists to expand the capabilities of American College of Epidemiology to promote the development of persons interested in the profession of epidemiology, and increase the knowledge and reach of epidemiologists in their quest to promote health, prevent disease, and decrease suffering among the greater community.

**Make a contribution today using
the enclosed form or visit us at:
www.myacefoundation.org**

What we do...

The Epidemiology Foundation receives, administers, and distributes grants for scientific, educational and charitable purposes consistent with the mission and activities of the Foundation's charter and the American College of Epidemiology.

We support:

- Endowed Lecture Series honoring groundbreaking contributions to seminal areas of epidemiology.
- Panel Discussions about the latest trends in the field.
- Promotion of networking and interaction among ACE Members & colleagues across epidemiology.
- Building diversity within the field.
- Research and Education.

We Need You! Donate Today!

The Epidemiology Foundation relies on the support of everyone in the public health community to realize its potential.

Benefits as a Foundation Donor

- Forwarding the important work of epidemiology & protecting public health.
- Recognition on the EF Honor Roll.
- Updates from the Foundation about your donation at work.

Epidemiology Foundation Leadership & Staff

The Epidemiology Foundation Board of Directors oversee the mission and vision of the Foundation. These dedicated volunteer leaders include epidemiologists who work in education, research, industry, government, and nongovernmental organizations.
